YOUR HANDS ARE
THE MOST
VULNERABLE PART
OF YOUR BODY...
AND THE MOST
SOPHISTICATED WORK
TOOL IN THE WORLD.

Our hands are often actively put into high-risk situations in the workplace.

This means that hand and arm protection is vital to keep safe at work. Injuries that can occur due to the incorrect use, or non-use, of protective gloves are many and varied. Some can result in long-term damage with serious health repercussions.

IT MAKES SENSE TO
PROTECT YOUR HANDS!

HAT CARE AND MAINTENANCE

Do:

- Check hard hats regularly for cracks, dents or other damage
- Replace hats if damaged or after their shelf-life expires (usually between two and five years, depending on level of use and manufacturer guidelines)
- Keep hard hats clean using warm, soapy water, not solvents or abrasives.

Don't:

- Store materials in your hard hat (it is not designed for carrying nails!)
- Store hard hats where they may be exposed to direct sunlight (the parcel shelf of a car, for instance) as ultraviolet rays can damage the plastic outer shell
- Fix any stickers to the hard hat or write on it (some materials may be weakened by certain chemicals and adhesives).
