SAFETY FOOTWEAR

YOU WALK **115,000** MILES IN YOUR LIFE TIME... DO IT IN **COMFORTABLE FOOTWEAR**

You need supportive, durable safety footwear that's fit for purpose.

We supply safety footwear that protects and performs in equal measure. Using our industry expertise we have created a footwear range that compliments the strong mechanical structure of your feet.

YOUR FOOT CONTAINS **26** BONES, **33** JOINTS, **107** LIGAMENTS AND **19** MUSCLES... IT MAKES **SENSE TO PROTECT THEM**

Common injuries are easily avoidable with the correct footwear.

We recommend a stable and hard working safety boot that prevents complaints, claims and fines by cushioning and protecting the sole, ankle and toes. Comfortable footwear improves staff wellbeing and productivity, from reducing common sprains to preventing leg, pelvis and upper body trauma.

Protect your feet with well-made and regulated safety boots that do their job.

MANPACK ONLINE PORTAL

Slater Safety are proud to be able to offer customers a 3-part comprehensive online ordering portal. The system is free, easy to use, navigate and will simplify and revolutionise the ordering process within any organisation. Our online portal guarantees the **right workwear** with the **right branding** at the **right price** and most importantly, delivered to the **right location**.

LOGIN ONLINE

Log in to your bespoke company portal

MANPACK PROCESS

DELIVERY

The package is dispatched and delivered to the requested address

ADD TO BASKET

Select employee. Choose required items with size and quantity.

LOGIN ONLINE

View basket, enter PO number and delivery address. Confirm order.

HOW WILL MANPACK BENEFIT YOU

-  Pre-arranged list of products selected and approved by your company
-  Order standard items and embroidery / heat sealed garments online
-  Special net prices agreed to give your company best value
-  Stock levels can be indicated as traffic light colours if needed
-  Special notes can be applied to orders if and when required
-  Depots and departments can be set up with different PPE grades linked
-  All orders and their current status can be viewed
-  Returns can be arranged online by manager / wearers
-  Reporting tool allowing you to see spend and usage in multiple formats

YOU WALK 115,000 MILES IN YOUR LIFETIME PROTECTIVE FOOTWEAR PREVENTS INJURIES

If you walk and stand on hard floors, your feet easily become overburdened and if wearing incorrectly fitted footwear the following conditions can occur:

PLANTAR FASCIITIS

Is the most common cause of heel pain. It is the inflammation caused by excessive stretching of the plantar fascia, the broad band of fibrous tissue which runs along the bottom surface of the foot, attaching at the bottom of the heel bone and extending to the forefoot. When the plantar fasciitis, which can also lead to heel pain, arch pain and heel spurs.

With Plantar Fasciitis, the bottom of your foot usually hurts near the inside, where the heel and arch meet. The pain is often acute either first thing in the morning or after a long rest, because while resting the plantar fascia contracts back to its original shape. The pain often subsides as the day progresses and the plantar fascia continues to be stretched.

HEEL SPURS

The heel bone is the largest bone in the foot and absorbs the most amount of shock and pressure. A heel spur is an abnormal growth of the heel bone. Bone spurs form when the plantar fascia pulls away from the heel area (a condition called plantar fasciitis), causing a bony protrusion, or heel spur to develop. While more people assume the heel spur itself is the cause of pain, it's not. The plantar fascia tissue pulling away from the heel bone is the actual cause of pain, especially while standing or walking.

CALLUSES

Calluses are unattractive and sometimes painful patches of thick skin on your feet that form when dead skin cells harden and thicken over an area of the foot. This build up is our body's defence against excessive pressure and friction. Eliminating the sources of the pressure is the first cause of actions.

This is often caused by: excessive pressure or friction on a specific area of the foot, wearing high-heeled shoes, wearing footwear that's too small, flat feet, high arched feet, excess body weight and abnormal walking motion.

ACHILLES TENDONITIS

Achilles tendonitis is an injury caused by overuse of the large tendon that connects the calf muscles to the back of the heel bone. When overused, the Achilles tendon can get irritated, painful, stiff and swollen. Although it is the largest and strongest tendon in the body, it is also the most injury-prone due to its limited blood supply and the enormous stress placed upon it. This condition is largely caused by: excessive rolling of the foot when walking, flat feet, short Achilles tendon, tight calf muscles, heel bone deformity, improperly fitted shoes, chronic overuse and direct trauma or injury.

HAMMER TOES

A hammer toe is a toe that is contracted at the PIP joint and can lead to severe pressure and pain. Ligaments and tendons that have tightened cause the toe's joints to curl downwards. Hammer toes may occur in any toe, except the big toe. There are 2 types: flexible and rigid. In a flexible hammer toe, the joint has the ability to move. This type of hammer toe can be straightened manually. With rigid joints, movement is limited and can be extremely painful. This sometimes caused foot movement to become restricted leading to extra stress on the ball of the foot.

FOOTSTOPSERVICE

FSS Anatomical Insole

The Jalas FootStopService (FSS) foot scanner prevents injuries that can arise if the foot is strained abnormally. This means that FSS functions as a form of preventive health care. It does not, however, replace medical treatment for injuries that have already occurred.

It is fast and easy to analyse your feet with the help of the FSS. You don't even need to remove your socks or stockings. In just a few seconds, the scanner detects the dimensions of your feet, the arch and the plantar pressure profile of your foot. You get the results immediately. On the display, you will see how and where your feet are being subjected to pressure and load. You will also see if you have a low, medium or high arch.

JALAS® anatomical insoles solve many problems – but not all. If you have significant problems with your feet, specifically moulded orthoses are a must.

Investing in the right shoes with the right insoles is an investment for your future.

FOOTWEAR GUIDE

All our footwear is designed with both comfort and durability in mind. With a range of different features ensuring we have powerful protection against a wide range of environments. All Slater Safety footwear conforms to EN ISO 20345 providing 200 joules of toe protection.

	Composite toe cap and mid sole		Composite mid sole
	Steel toe cap and mid sole		Steel mid sole
	Aluminium toe cap and mid sole		Aluminium mid sole
	Composite toe cap		Heat Resistant
	Steel toe cap		Shock absorbent
	Aluminium toe cap		Water Repellent
	Anti static		Metal free
	Puncture resistant		Slip resistant
	Waterproof		Wide Fit

SB: Basic safety shoes with a toe cap

S1: Safety shoes for professional use with toecaps designed to give protection against impact when tested at an energy level of 200 joules. Antistatic properties, energy absorption of seat region, closed heel and resistance to fuel oil.

S1-P: As S1 plus anti-penetration mid sole

S2: As S1 plus water resistance and water absorption of upper material

S3: As S2 plus anti-penetration mid sole and cleated out sole

S4: As S1 plus an entirely moulded polymer/rubber upper making them leak-proof

SRC: Tested on ceramic tile wetted with sodium lauryl sulphate, and tested on steel with glycerol.

SRA: Tested on ceramic tile wetted with sodium lauryl sulphate (a diluted soap solution)

SRB: Tested on steel with glycerol

HRO: Tested to hot contact up to 300°C

MAINTENANCE:

With all footwear it is essential that you clean and maintain your footwear regularly. This ensures that the footwear achieves optimum performance of properties built into the footwear at the time of manufacturing. Here's a step-by-step guide to giving your footwear what it needs:

LEATHER:

- 1** Ensure that any large chunks of dirt are removed.
- 2** Apply leather cleaner to a clean cloth and gently rub this into your shoe to remove any stains.
- 3** Wipe the shoes down with a second dry cloth and leave to dry naturally.

For added protection, rub mink oil into the leather to help preserve them. Rub the shoes again with another clean cloth to remove any excess mink oil. You can then apply a weather-resistant product, in the form of gel or spray, to the leather and allow the shoes to dry.

SUEDE LEATHER:

- 1** Run a dry suede brush over your footwear, paying special attention to areas with dirt on.
- 2** Pour a small amount of baking soda over oil stains or wet stains, then leave overnight to absorb powder.
- 3** In the morning, brush the powder off with your suede brush and ensure that no powder is left remaining.
- 4** Finally, spray your footwear with a weather resistant spray specifically for suede.

Slater Safety are proud to be able to offer our valuable clients PPE vending. Buy using PPE vending your team will have 24/7 access to product and your guaranteed to see a 20-40% usage reduction.

FootStopService (FSS):

Our FSS foot scanner prevents injuries that can arise if the foot is abnormally strained. In just a few seconds the scanner detects the dimensions of your feet, the arch and the pressure profile of your foot.

Noise Assessment:

Slater Safety offer a noise exposure survey, which monitors level of noise for a single machine, factory, warehouse or workplace. Monitoring sounds will help your company decide what PPE needs to be used.

Bespoke Online Solution:

Manpack: This allows employees and managers to place orders clothing from a pre-arranged range and receive goods ready packed for easy distribution. Garment selection can vary for different departments across your business.

Trade: This is our web based wholesale ordering module. This can be used by account customers or trade agents. This allows you to order from garments online at your special price.

StockRoom: Allows sites to hold a set of stock items in-house. Perfect for companies working with shifts.

**SIMPLE SOLUTIONS.
POWERFUL PROTECTION**
