6 REASONS WHY THE RIGHT UNIFORM CAN HELP YOUR BUSINESS BRAND AND STAFF

Uniforms Encourage Team Spirit

Everyone is equal and are part of the same group, and so will start acting as such.

Health and Safety

There are some jobs that demand uniform for health and safety reasons.

Uniforms Promote Your Business

Whatever the style of uniform, it's a fantastic way of instilling your branding into the public consciousness.

Identify Who Works for You

Allows customer to easily identify who works for you.
Internal staff can see at a glance if there's an intruder.

Employees more Conscious of Actions

When staff are easily identifiable they are more aware of their actions.

Uniform can Enhance Self Esteem

Staff take ownership of desirable, popular and stylish uniform, thus improving moral, confidence & performance.

WHO ARE SLATER SAFETY

OUR MISSION

"We provide solutions that ensure your employees stay safe and go home in the same health that they arrived in"

Are you up to date and getting all the help you need to keep your employees safe?

Did you know...

- **New** regulations mean pay-out claims from work place accidents are at an all time high.
- **New** certification methods mean that some PPE is now rated differently and products are no longer certified as suitable for your current working needs.

Don't get caught out! In today's changing world you need honest unbiased advice to guide you in making the best choices for the safety, health and compliance of your employees.

That's what we are here for. Slater Safety's quality PPE and honest advice means you have all the help and support you require, giving you the peace of mind you need about your workforce. We have been established in the supply of PPE to the industry for more than 20 years, built on trust, in depth product knowledge and a culture of continuous improvement.

We will work hard to build a strong working relationship with you, providing consistency, quality, and service with a willing 'can-do' approach to your needs. This is supported by our easy to use systems that will provide you with the ultimate control and management of all PPE spend.

To enjoy these benefits and the latest technology in the vast world of 'keeping safe', please contact us. Your safety is our priority.

SIMPLE SOLUTIONS. POWERFUL PROTECTION.

A handwritten signature in white ink that reads "J. Slater".

JON SLATER
Managing Director

WHAT DO CUSTOMERS SAY

I have regular communication with Slater Safety and their representatives visit often to ensure that I am kept abreast of new developments and answers to the more specific inquiries I have made. I made the decision to move from another Supplier of my safety products who is well known nationally to Slater Safety - A decision I have not regretted. Their systems have provided better controls, improved recording and an easier handling process. I have only had positive reactions from our personnel on the use of the system.

BY: Health & Safety Manager @
Manufacturer of Polymer Solutions

Slaters are always happy to go the extra mile when we require anything new. We put the phone call through and they will come to our site and show us the products. Also if we need an emergency delivery, they will make the effort to bring them in asap. I don't have any problems with ordering or delivering.

BY: Health & Safety Manager @
Nationwide Food Manufacturer

Slater Safety team are fast and reliable and even so when needing a new product adding to the web page. Delivery is speedy and communication is fantastic. We have moved most of our PPE orders over to Slater Safety due to the product prices, product quality and the good relationships.

**BY: Procurement Assistant @
Pharmaceutical Manufacturer**

Always willing to go the extra mile even at short notice, samples no issue, I personally have been very happy with the merchandise that I sourced and later ordered for my company. Price requests are back within the hour.

BY: Health & Safety Manager @
Manufacturer of Promotion

Thanks for your speedy turn around, it's an example of Slater Safety's great service whenever we are in a sticky wicket.

BY: Store Procurement Manager @
Leading Commercial Kitchen Supplier

Excellent company to deal with. Nothing is ever too much trouble. They will source goods that are not currently held as stock. Special deliveries are no problem and they will call anytime out of their scheduled delivery slot if required. Their products are always of good quality and always offer very competitive pricing. The staff are friendly and are always happy.

BY: Hygiene Team Leader @
National Food Manufacturer

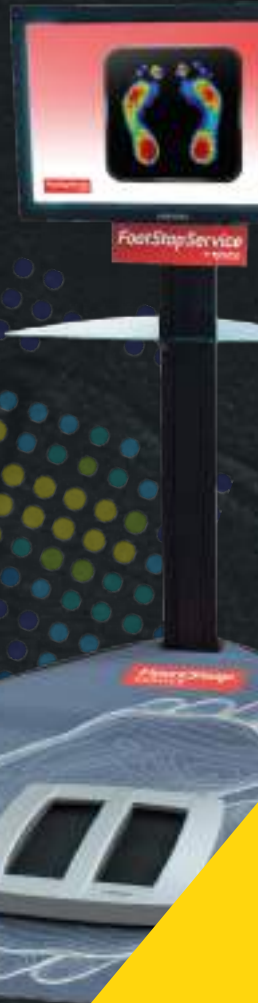

EXTRAS FROM SLATER SAFETY

The FootStopService (FSS) foot scanner prevents injuries that can arise if the foot is strained abnormally. This means that FSS functions as a form of preventive health care. It does not, however, replace medical treatment for injuries that have already occurred.

It is fast and easy to analyse your feet with the help of the FSS. You don't even need to remove your socks or stockings. In just a few seconds, the scanner detects the dimensions of your feet, the arch and the plan-tar pressure profile of your foot.

You get the results immediately. On the display, you will see how and where your feet are being subjected to pressure and load. You will also see if you have a low, medium or high arch.

JALAS® anatomical insoles solve many problems – but not all. If you have significant problems with your feet, specifically moulded orthoses are a must.

Intelligent Delivery Service:

Flexible delivery times to suit you

Consistent personal service

Hassle free return services

Delivering to the correct site location every time

Goods handled with care

Next day nationwide delivery by DPD

VeriPRO

VeriPRO makes it easy to get an accurate, real-world picture of your employees' hearing protection. Find out whether your employees are receiving optimal protection, require additional training on how to fit their ear-plugs, or need to try a different model. VeriPRO uses sophisticated software in a user friendly format to find out the Personal Attenuation Rating your employees are receiving from their earplugs.

- ✓ Measures real world attenuation by using unmodified earplugs
- ✓ Fast, accurate, easy-to-understand results displayed within minutes
- ✓ Captures and stores historical information on employee PAR
- ✓ Fulfills regulatory requirements to "ensure proper initial fitting" of hearing protectors
- ✓ Works with any earplug

MANPACK ONLINE PORTAL

Slater Safety are proud to be able to offer customers a 3-part comprehensive online ordering portal. The system is free, easy to use, navigate and will simplify and revolutionise the ordering process within any organisation. Our online portal guarantees the **right workwear** with the **right branding** at the **right price** and most importantly, delivered to the **right location**.

INHOUSE **BRANDING** SERVICES

If you're looking for branded and promotional clothing, it's worth choosing your supplier with care. With Slater Safety you'll have the best possible products, quality, customer service and support – guaranteed!

How your staff look influences how others judge your organisation. Uniforms and workwear also impact internally on morale, well-being and most of all staff productivity.

Slater Safety offer a wide range of printing and embroidery onto a range of promotional clothing, workwear and corporate clothing. Here we use colour matching systems to ensure the printing matches your company guidelines along with personalising your products to exactly how you want them.

INHOUSE TRANSFERS

Slater Safety have invested in heat press machines to maintain and monitor the quality of our transfers, and to increase turn around and increase speed with urgent orders. Our Promise on this service is 48hours.

INHOUSE EMBROIDERY

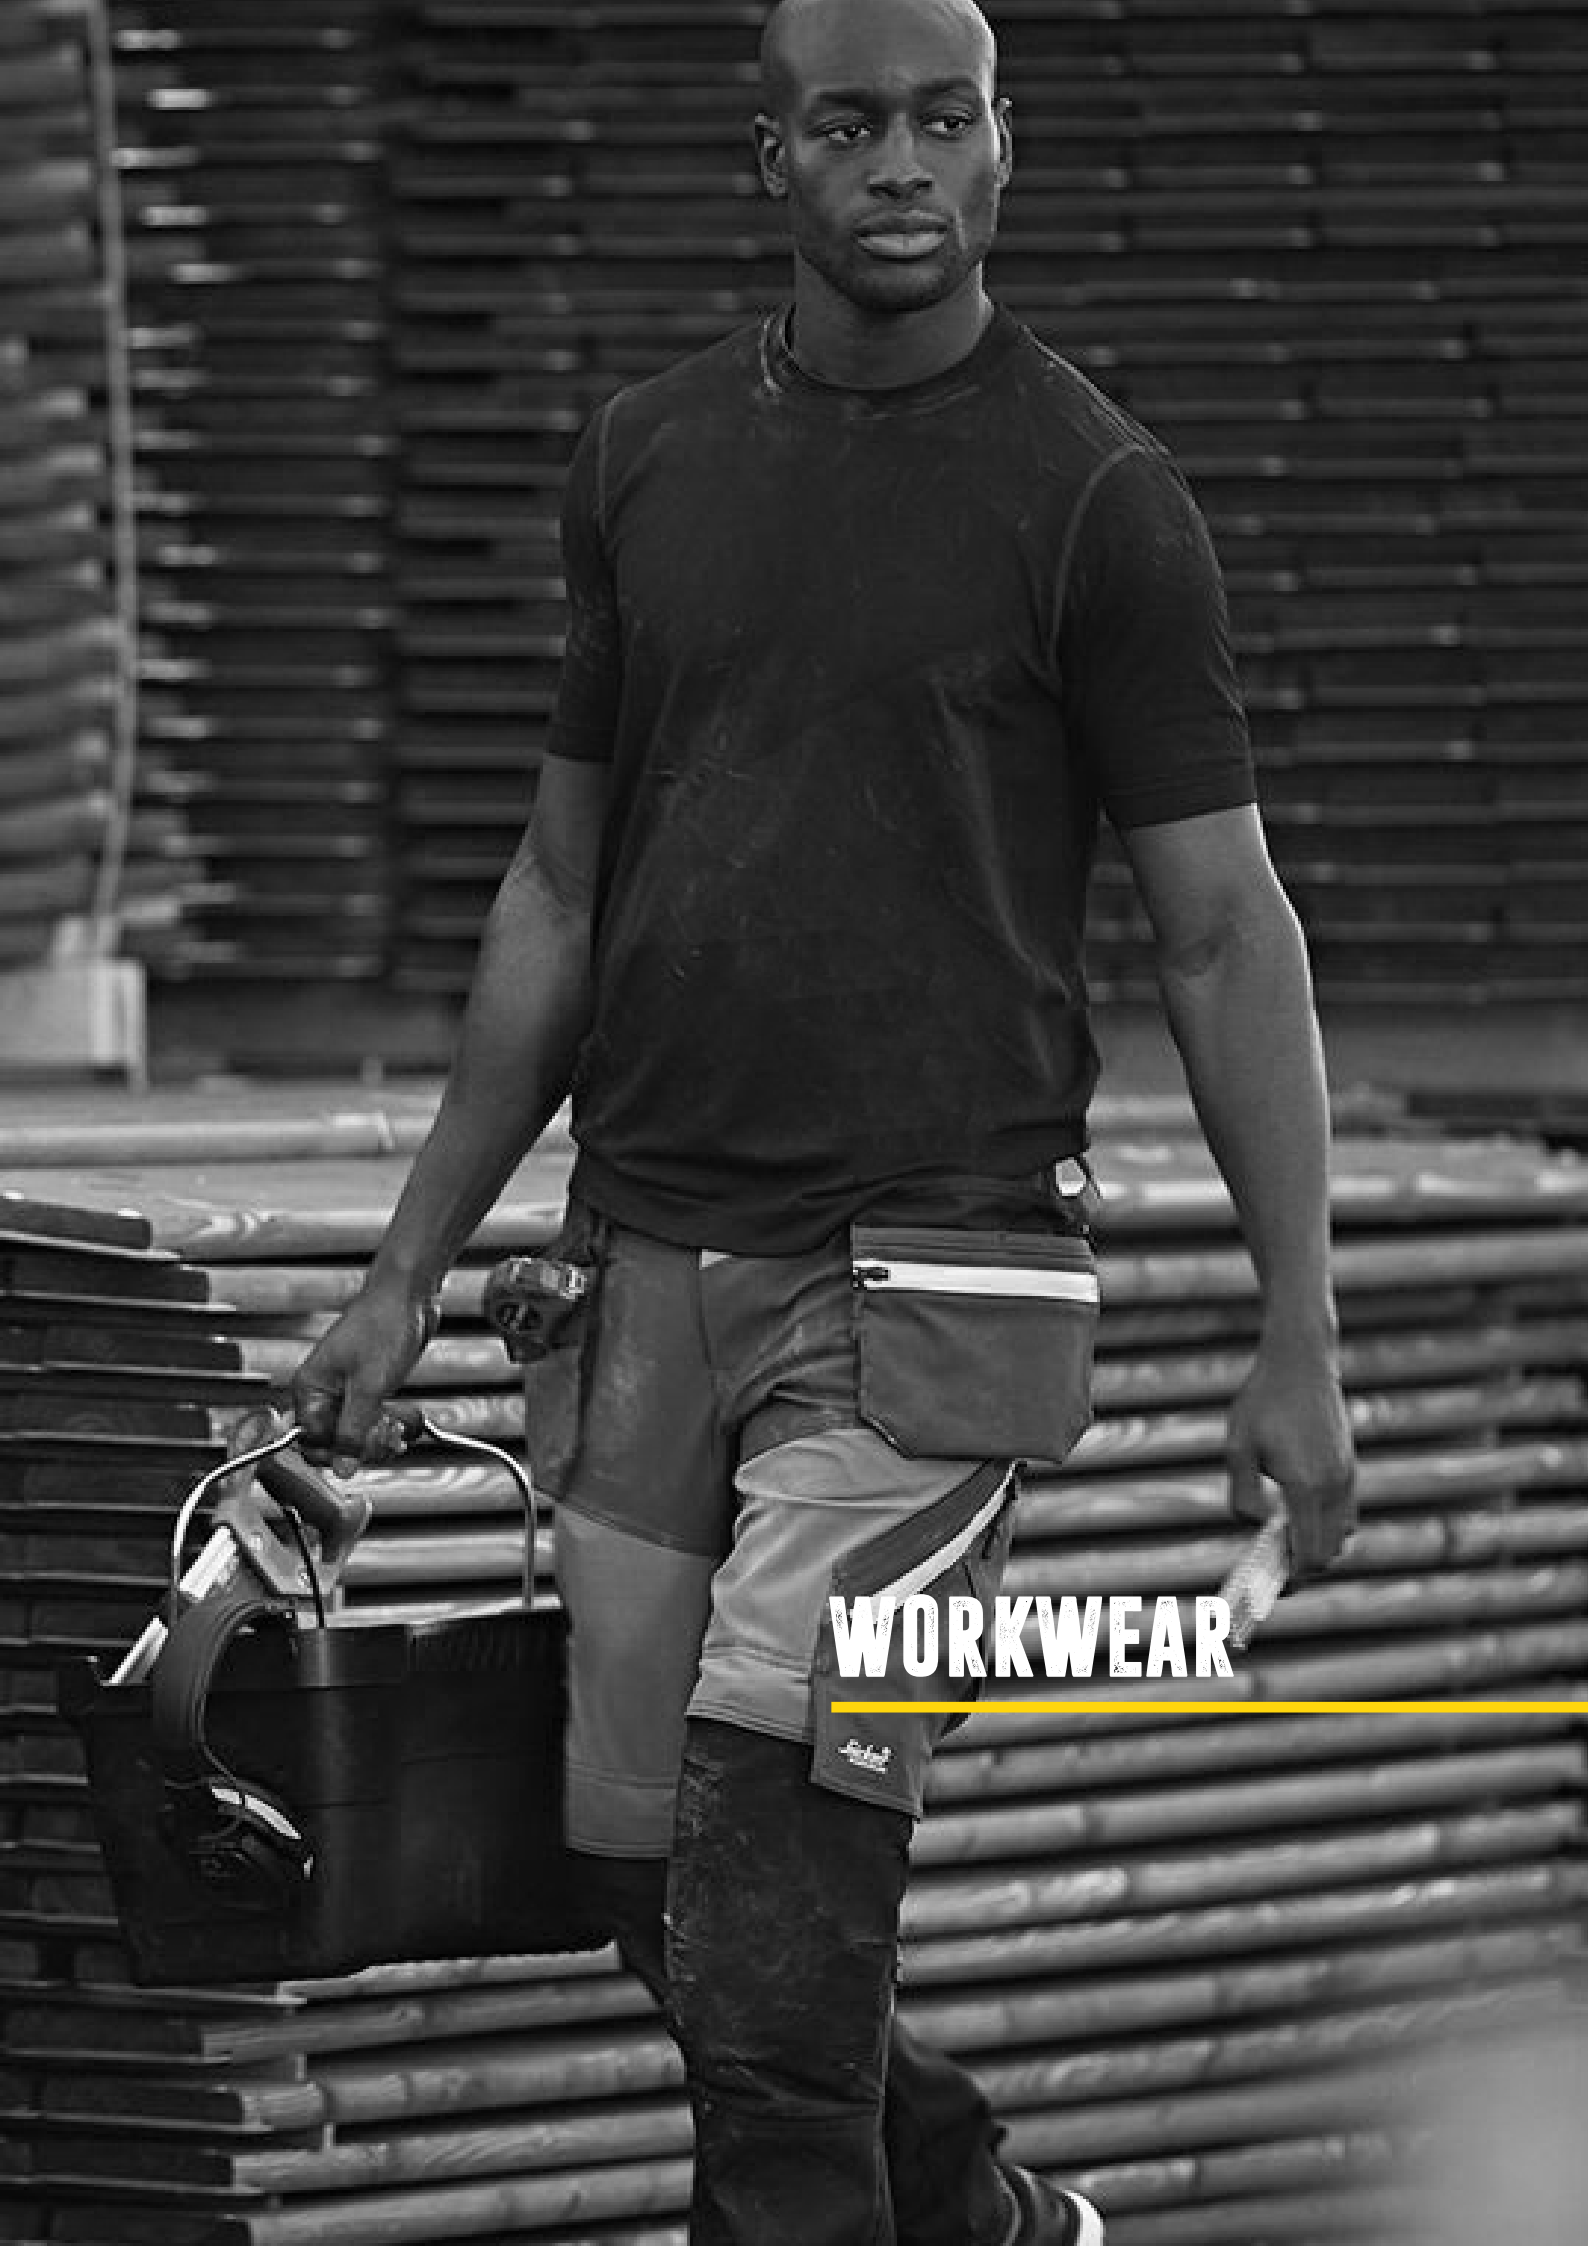

Slater Safety has its own embroidery production plant which operates throughout the day. Our company has invested in the high tech machinery to ensure our branded products are recognised for their quality, and to maintain a quick turnaround. Our delivery promise on embroidery is 5 days depending on stock.

DIRECT PRINTING

As well as Embroidery and heat transfers Slater Safety offer a printed helmet service, which again is done in house. This enables your staff to have logos printed for the front, side or rear of the helmet, or a combination of 3.

Slater can brand almost any garments in a range of positions, example for upper garments are to the right. Options are not limited to logos, we can also embroider text, such as employee names, job descriptions, departments as well as your chosen logo.

Working Xtreme

BY ELKA

Functional outdoor requirements are increasing every day. Freedom of movement must be absolutely light and waterproof clothing should not be an obstacle. It should be tough, practical and, of course, keep the body warm and dry - all day!

The Working Xtreme series is 100% windproof, waterproof and breathable for optimal comfort and freedom of movement. The collection is a 3-layer design with details such as reflective, or even hi-visibility workwear, which can be used all day long.

Visible Xtreme

BY ELKA

Increased visibility in the workplace makes lower accidents. It applies to road works, airports, construction sites etc. Freedom of movement, must be absolutely right and waterproof, nothing should not be an obstacle. It should be trendy, practical – and of course keep the body warm and dry – all day.

The Visible Xtreme series maintains the practical and full. The series is EN ISO 20471 certified and 100% waterproof, waterproof and breathable for optimum comfort and freedom of movement. The collection is Scandinavian design with safety and functionality, delivers thermal protection, which can be used all day long.

(B) = Currently a Non-Stock Item: Call for a lead-time

A black and white photograph of a construction worker standing on a wooden scaffold. The worker is wearing a light-colored long-sleeved shirt, dark cargo pants, and a tool belt. They are holding a long wooden pole or ladder. The background shows a cityscape with buildings and hills under a cloudy sky. The image has a dark, moody tone.

ACCESSORIES

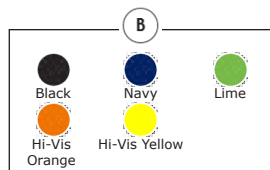

BASEBALL CAP

C07.BB01

- Windproof, breathable and lightweight cap
- Seamless supported front panel
- Pre-curved peak with 6 stitch lines
- Stitched eyelets
- Tear release size adjuster

- Zippered rear pocket
- Suitable for embroidery and press print
- Capacity: 2.5 litres

SIZES: One Size

(A) = Stock Item

(B) = Currently a Non-Stock Item: Call for a lead-time

SAFETY EN STANDARDS

EN ISO 20471:2013

The standard by which all high-visibility garments must comply. It defines the specifications for high-visibility warning clothing and is grouped into three classes, which are based on the conspicuity they provide. All garments must have reflective tape not less than 50mm wide.

CLASS 3: HIGHEST level of protection

Minimum background material 0.80m²
Minimum retroreflective material 0.20m²
Horizontal reflective band can now have an incline of +/- 20°

CLASS 2: INTERMEDIATE level of protection

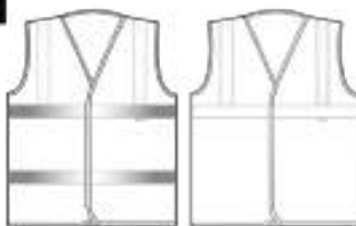

Minimum background material 0.50m²
Minimum retroreflective material 0.13m²

CLASS 1: LOWEST level of protection

Minimum background material 0.14m²
Minimum retroreflective material 0.10m²

Minimum level of protection required for any persons working on a private road or to be used in conjunction with a higher classed garment.

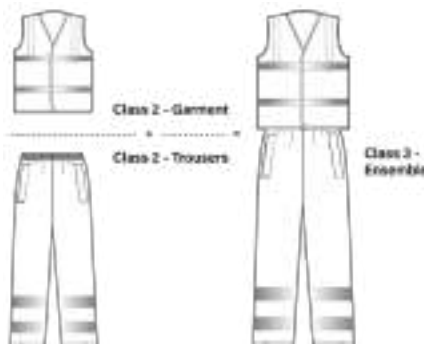

Intermediate level required for any persons working on or near A and B class roads, also for delivery drivers.

Highest level of protection required for any persons working on or near motorways or dual carriage ways or airports.

Garment Combinations.

The standard also permits this performance class to be met by specifying a single garment or a combination of garments - for instance, a class 2 jacket and a class 2 pair of trousers as a class 3 combination. Where a combination is specified, this will be deemed to meet the requirements of the standard only when the supplier provides clear instructions on how the classification has been achieved. A class 3 garment is required to cover torso and have sleeves with reflective bands or/and trouser legs with reflective bands. The area of background or retroreflective material that is covered by badges, logo, lettering etc. shall be excluded from the calculation of the required minimum area (unless these additions meet the requirements).

RIS-3279-TOM (formerly GO/RT 3279)

This standard is specific to workers in the railway industry.

This replaced GO/RT 3279 Issue 8 on 04.03.2017. Document mandates the minimum requirements for hi-visibility clothing to ensure conspicuity for workers operating trackside or lineside.

The testing criteria for RIS-3279-TOM is identical for GO/RT 3279 Issue 8, therefore products conforming to GO/RT 3279 Issue 8 can still be used for trackside or lineside requirements.

The Fabric Colour is a specific type of Orange and has to be certified to conform or it cannot be used on UK Railways or surrounds.

EN 343:2003

Protection against precipitation as rain or snow, fog and ground humidity. Resistance to water penetration and water vapour resistance are the two main properties which are tested in the **EN 343**. On the label **EN 343** will be followed by two numbers. For example, **EN 343 Class 3:3** The first digit denotes its water penetration resistance, whilst the second digit denotes its breathability.

Resistance to Water Penetration	
Class 3	Highest level of foul weather protection
Class 2	Intermediate level of foul weather protection
Class 1	Lowest level of foul weather protection

Breathability	
Class 3	Highest level of breathability
Class 2	Intermediate level of breathability
Class 1	Lowest level of breathability

Please note: EN 343 certified garments will protect the wearer against these conditions provided that:

1. The garment is closed before use to ensure maximum protective performance.
2. The fabric is clean. (If it is dirty its performance may be impaired)
3. The protective clothing is stored in a dry and well ventilated space.
4. The garment is cared for according to the instructions inside the garment to ensure maximum protective performance.

Protective Clothing - General Requirements EN 13688:2013

This standard influences all the protective clothing standards by ensuring that sizing, washing and marking requirements are maintained.

Selection of the most suitable class of garment is based on your risk assessment. However, in certain situations guidance is given regarding what class of protective clothing should be worn.

EN 342:2004

Test method for garments and clothing combinations designed to protect the wearer in a cold environment.

MEASUREMENT GUIDE

It is important to measure your body accurately for garments to fit correctly. Measure over light clothing or underwear. Make no extra allowance for movement ease, we do that for you when designing our products.

LADIES

1. BUST

Measure around the fullest part.

2. WAIST

Measure around the natural waistline.

3. LEG LENGTH

Measure from top of inside leg to the required length.

MEN

1. COLLAR

Measure around the base of neck and make sure the tape fits comfortably.

2. CHEST

Measure the fullest part of the chest normally under the arms.

3. WAIST

Measure around the natural waistline.

4. LEG LENGTH

Measure from top of inside leg to the required length.

The chest sizes shown are a 'to fit' body size. These are not the actual size of the garment which will be larger than the chest size shown to allow the wearer movement and to fit into the garment comfortably. The garment measurement will vary between 2" / 5cm to 5" / 10cm depending on the garment style and fit.

SIZING GUIDES

These size guides are given for approximation only across our spread of workwear and clothing. If you are looking for a specific size chart for a manufacturer, please contact your account manager or the sales office on 01772 691000. All manufacturers have slightly different garment sizing so best to double check before ordering.

This table is a generic sizing chart.

Size	2XS		XS		S		M		L		XL		2XL		3XL	4XL		5XL

	40° wash reduced action	Chlorine bleach ok	Hot iron	
	40° wash delicate programme			

Please take time to find the label inside each of the clothing items which show the appropriate care instruction.

GARMENT CARE

We take great care to use quality fabrics for all our ranges. Garment and fabrics are tested under carefully monitored conditions in accordance with recognised standards. Wash tests check for colour fastness, shrink resistance and care label accuracy. Wear tests are undertaken to check the serviceability and longevity of garments.

LAUNDERING

Always refer to the care label before laundering and ensure the care label instructions are adhered to. Always wash dark colours separately. Fabric softeners and conditioners may prove detrimental to the performance of some garments.

GARMENT SHRINKAGE

Excessive shrinkage is primarily due to factors such as heat and major agitation during the wash cycle. Always wash as per the instruction as stated on the care label.

PILLING AND BOBBLING

Abrasion and timely washing of garment with fabric softeners leads to fibre balls appearing on the surface of the fabric. Remove balls by mild surface brushing. We strongly recommend not to use fabric conditioners in the wash.

TRIMS AND ACCESSORIES

Trims and accessories like zips, toggles, pocket linings and elastic cords are constructed for normal use.

COLOUR STAINING

Wash similar colour garments together. Do not leave damp garments together for any length of time.

TUMBLE DRYING

Do not tumble dry any garment that has a transfer finish - the agitation and heat will destroy the transfer.

GARMENT COLOURS

Please note, colour icons in this catalogue may vary from the actual colour of the garment. Please contact us if you would like to see an image of any particular colourway before you order.

RETURNS

1. We will be unable to accept goods returned without an authorised returns number.
2. A returns form issued by Slater Safety must be completed in full, clearly stating the reason for return.
3. Goods returned for full credit must be in re-saleable condition and in the original packaging. No goods, which have been worn, marked or used in any way, will be considered for full credit.
4. Goods returned and considered faulty must be in a condition that will allow examination i.e. clean and free from contaminants. The reason for return must be stated on the returns form.
5. It is a legal requirement that medical, aviation, breathing apparatus and respiratory products must have a decontamination certificate stating that the returned products are free from any human, animal, chemical and biological contamination.
6. Only chemicals recommended in the manufacturers instructions or manual should be used in the cleaning of goods prior to returning.
7. Where goods are returned without good reason, Slater Safety reserves the right not to credit or to impose a 30% re-stocking charge.
8. Goods supplied as a special order or, if they have been marked with a company logo, cannot be returned, unless it can be clearly demonstrated to be a Slater Safety error.
