- ♦ Low stock notifications
- ♦ Consumption reduction of up to 40%
- ♦ Only approved items can be vended
- ♦ Increased Productivity
- ♦ Tracked stock usage

PPE VENDING SOLUTIONS

Slater Safety are proud to be able to offer our valuable clients PPE vending.

Our PPE vending machine can hold a wide variety of products from eye wear to hand protection, giving your employees 24/7 access. This solution will mean you are guaranteed to see a reduction of up to 40% in your PPE usage, this is generally due to the traceable factor of the vending.

Slater Safety will provide PPE vending machines on a one off purchase or on a monthly rental, with a full service and break down back up.

Key points to consider:

- Card or ID reader to be agreed, this depends on what the customer is currently using.
- Service levels and top up facility to be agreed, this depends on what items are being vended and there usage.
- Internet access to be agreed.
- We would recommend a consignment stock facility to run along sided this solution.

Implementing your PPE Vending Solution:

1) We will review your fast moving PPE items, analyse usage and make any suggestions that may help you gain the most value out of your Health and Safety Spend.

2) Installing the machine/s and filling them with product.

3) Members from our team will carry out a brief training session so your workforce have the training and on-going support needed.

4) Once all initial set up and configurations have been agreed, we can then arrange a stock management programme to ensure we keep the stock replenished.
